FY21 RAS HIGHLIGHTS: SEPTEMBER 2020 - JANUARY 2021
RAS-WIDE WORKLOAD

The RAS Unit Capacity data provides an overview of the key pre- and post-award data that describe the staff members’ workload.

- Pre-award workload is represented by the average number of proposals submitted per pre-award FTE/month.
- Post-award workload is represented by the average number of sponsored projects managed per FTE/month.

The average pre- and post-award workload across all RAS units and in the SOM RAS units is also provided for comparison purposes. Increases and/or decreases can be attributed to increases in changes in proposals submission per month, changes in volume of sponsored project activities per month, prolonged RAS staff vacancies, RAS staff turnover, and/or the addition of McKinsey hires. These data simply provide a snapshot of RAS staff workload.

**NOTE:** Although RAS leadership may be required to handle proposal submissions and/or award management, this data does not reflect those incidences.

NOTE: Prior to the launch of the RAS shared services model, Emory’s Business Process Improvement unit and external consultants Price Waterhouse Cooper developed a methodology to recommend staffing ranges for the RAS units. The model is based on activity time estimates and volume multipliers for 58 pre- and post-award tasks. The ranges are updated annually to include volume multipliers based on the previous year’s activity. These salary ranges combined with other metrics (including, but not limited to, proposals submitted / FTE, projects managed / FTE, faculty feedback, and turnover) provide indicators to inform staffing decisions in the RAS units. The FY20 recommended staffing range, based on the PWC model, is included in the table above.
